Expected results:

Word-ből bemásolt szöveg The present document summarizes the main aspects of a high quality TCA. The E&T TCA Working Group, comprising 12 TCA officers - having long-standing experience in organising and hosting TCAs - proposed the elements. The work was coordinated by SALTO E&T TCA Resource Centre between September 2018 and February 2019 and resulted in the Good Practice TCA template presented here. National Agencies are recommended to use these guidelines when realizing transnational cooperation activities. The categories are structured according to the TCA lifecycle and include aspects to consider at each step. However, it is important to determine quality guidelines and criteria, but it is also important to keep in mind that every TCA is different there could be additional factors to include in the case of local or sectorial specificities.

- What innovative, collaborative, interactive and various methods did you use during the event in order to ensure high quality TCA? (Using online or offline tools, etc.)
- How could you facilitate continuous cooperation with all partners throughout the event?
- How did you monitor and reflect on beneficiaries' needs throughout the event? Did you have to change any parts of the event due to the participants' needs?
- How did you ensure that the event proceeded according to the goals set? (monitoring process, constant collection of information, analysis, supervision)
- How could you measure the immediate success of the TCA? On what aspects did you evaluate your TCA? (Outputs, outcomes, achieving goals set, etc.)
- Who evaluated the realization of the TCA event? (Participants, partners, self-evaluation, etc.)
- What tools did you use to evaluate TCA? Did you prepare quantitative review of the TCA? What factors, aspects did you use? (Number of applicants, participants, compared to similar TCAs, etc.)?
- In what ways did you facilitate participants' contact before, during and after the event?
- How did you share TCA outputs, training materials, etc. with participants before/during and after the event?
- What fora and channels did you use to disseminate TCA in order to maximize the impact of the TCA? (to reach the widest target audience)
- Who did you target with your TCA outcomes? How did you involve target group in the event?
- Was the application and selection process open, fair and transparent?
- Did the application criteria contain clear profile of participants?
- Did the application and preparation process take place in time?
- What were your method to hit the manageable and balanced number of participants? (both for countries and individuals)
- How did you plan TCA event budget to foster realization?
- How detailed workplan did you prepare?

(Responsibilities, tasks, deadlines, etc.)How did you think your human capacities over, that is necessary to implement the TCA? (human-resource plan or other method)What other planning techniques did you apply? vége
